Thank you Tom, I'll follow up with Scott Adams.

Julie

I have not had any input from any source. I have an inquiry from Mike Luce as to the status of the Water credits issue, but that is not my issue. I know there are water credits, but that doesn't mean they should naturally follow the lifting of the restriction. It looks like Doug Selby is examining that issue. This group is never satisfied--if they could get the property for free, they would still want additional consideration for their trouble in having to deal with us.

Hi Tom,

Can you update me on the status of the Walters purchase. I know we we're waiting on a final map from public works when I left last Thursday, any luck?

Julie Quisenberry

Attached are drafts of the proposed agreement with the Exhibits attached, together with final drafts of each of the Exhibits in execution form. Mike Luce delivered to me a disk with the map showing the setback area, but it is in Adobe so I can't work with it. What we need is a blowup of the setback easement area, designating it as such on the map and providing the measurements on the map. If we had that, we could dispense with any further description of the area. Left unresolved is the issue concerning the water credits and whether they should be transferred to Stallion Mtn. or whether they should be cancelled as of closing.
