This is in the works. Could you find out the drop dead date on this?

David, would you please get this information. Please send to Mr. Goecke for his review first. Thanks!

Brenda

I need an assessment by one of our outside WPCF engineering consultants regarding the effectiveness of our odor control program. I need this for distribution to Mayor and Council prior to our July 20 meeting for the item related to the Walters deed restriction. Hopefully, one of the firms that worked on the odor control program can give an assessment regarding how much we've improved the situation and the likelihood of future complaints compared to the record of complaints when we first acquired the buffer land that is now the golf course. This can be a letter report as long as it is signed by a P.E.

As part of this request I'd also like any records of complaints from the Clark County Health District and Clark Co. Air Quality management. Finally, please provide a copy of the odor easement document that is required to be executed by any purchaser of property in the vicinity of the City and County wastewater plants.

Betsy, when this is pulled together please provide it to the entire Council. Scott is working on a companion request to do a valuation assessment.
